

W1: ANTHRO FOUNDATIONS

Anthropology: comparative study of human life/culture; makes strange familiar + familiar strange. **Culture:** learned/shared/contested systems of meaning/practice; everyone has culture; not bounded like a sealed box. **Social norms:** unspoken rules; violations reveal expectations. **Othering:** producing “us/them” by language/images; makes unequal hierarchy seem natural. Watch terms: “primitive,” “savage,” “magic,” “rites,” “tradition,” “tribe,” “natives.” **Early model:** Western/intrepid white male scholar, Western institutions, field = non-West, knowledge extraction; linked to colonialism. **Noble savage:** romanticized non-West as pure/natural but still objectifies. **Great Man theory:** history via heroic individuals; anthro counters w/ structures, culture, social life. **Individual choice** alone insufficient: choices shaped by norms, habitus, institutions, power. **Freudian/psychology-only explanations:** anthro adds cultural/social context.

Articles always know: Miner

Miner, Nacirema: satire of Americans (Nacirema=American). Bath-room=shrine; medicine cabinet=charm box; dentist=holy-mouth-man; hospital=latipso. Purpose: exposes ethnocentric language; familiar practices look bizarre when described as exotic rituals. Takeaway: do not confuse descriptive distance with objectivity; language frames moral judgment. **Test use:** If prompt mentions ritual/body/magic/health/othering, cite Nacirema to show relativism + critique of ethnographic voice.

W2: BOAS / RELATIVISM / RACISM

Franz Boas: anti-evolutionist, anti-racist; cultures must be understood historically + on their own terms. **Cultural relativism:** interpret beliefs/practices in local context; not the same as approving everything. **Ethnocentrism:** judging others by one's own standards; often invisible. **Biological determinism:** bodies/genes determine ability, disease, criminality, intelligence, jobs. **Scientific racism:** fake science ranking races; used to justify slavery/colonialism/segregation. **Social evolutionism:** societies ranked from “primitive” to “civilized”; abandoned because teleological, racist, empirically weak. **Salvage ethnography:** urgent recording of cultures assumed to be disappearing; moral impulse but problematic (freezes culture; ignores colonial causes; treats people as vanishing objects). **Colonialism + anthro:** discipline emerged in imperial context; knowledge often helped rule. **Margaret Mead:** study other societies to answer questions about one's own society.

W2: MALINOWSKI / METHOD

Malinowski: long-term fieldwork, learn language, live among people, document everyday life. **Imponderabilia of everyday life:** small routines, gestures, rhythms; often more revealing than formal statements. **Participant observation:** participate in daily life while observing social behavior; balances emic intimacy + etic analysis. **Fieldnotes:** detailed records of observation, interviews, context, reflexive thoughts. **Ethnography:** both method + written product. **Interviews:** structured=pre-set; semi-structured=guided but flexible; unstructured=open. **Key informants/interlocutors:** people who explain local meanings; not neutral representatives of whole culture. **Armchair ethnography:** theorizing from others' reports; no fieldwork. **Veranda ethnography:** researcher stays at colonial outpost, locals come to them; distance from everyday life. **Headhunting:** example used to think beyond sensational surface to social/political meaning. **Emic:** insider categories/meanings. **Etic:** analytic outsider categories. Best work often combines both.

Boas Reading: Eskimo

A Year Among the Eskimo: field experience, learning by immersion; challenges exotic stereotypes; shows environmental adaptation, social life, stories, practical skill. Use for cultural relativism + critique of judging Arctic practices by outside comfort/standards.

W3: POSITIONALITY / HURSTON

Insiderness/outsiderness: not binary; degrees depending on race, class, gender, language, nationality, education, situation. **Rosaldo:** grief/position can deepen understanding; emotions shape knowledge. **Narayan:** “native anthropologist” is oversimplified; everyone has shifting identities. **Hurston, Mules and Men:** Black woman anthropologist; student of Boas; Eatonville, FL; documents folklore, jokes, speech, everyday life. **Dialect:** Hurston records authentic speech; controversy: some Harlem Renaissance critics saw it as stereotypes, but it preserves linguistic/cultural richness. **Burden of representation:** minority author/scholar is pressured to represent whole group positively/correctly. **Terms shift:** “native”/“informant” increasingly replaced by locals, interlocutors, participants, collaborators.

W3: SAID / NADER / KNOWLEDGE

Said, Orientalism: Western knowledge system constructs “the East/Orient” as irrational, sensual, despotic, backward; West becomes rational, modern, superior. Knowledge is not neutral; it authorizes rule/intervention. **Orientalism examples:** Middle East/East Asia treated as timeless/exotic; stereotypes substitute for actual complexity. **Nader, Studying Up:** anthropologists should study elites, corporations, states, bureaucracies, scientists—not only marginalized “others.” **“New savages” critique:** when anthropologists study West, they may simply relocate othering onto poor/working-class/Western subcultures. **Knowledge ethics:** Is acquiring/sharing knowledge always moral good? For whom? Could knowledge be used for control, military, corporations? **Exam link:** Said + Nader = power shapes both what is known and who becomes object of knowledge.

W4: CULTURE CONCEPTS

Culture is not: bounded container, homogeneous group essence, static tradition, only non-Western. **Culture is:** contested, learned, symbolic, practiced, power-laden, lived differently by individuals. **Borders:** cultural boundaries are porous; diaspora/globalization complicate nation=culture. **Contestation:** people

within same culture disagree. **Individual vs group:** culture shapes choices but does not mechanically determine them. **Carroll:** misunderstandings arise when taken-for-granted assumptions differ; “home,” conversation, politeness, directness, privacy vary. **Anthro vs psych:** not just individual motives; asks what shared meanings make behavior sensible.

Geertz / Interpretive Anthro

Geertz: culture = webs of significance humans spin; analysis = interpretation of meaning. **Thick description:** describe behavior + cultural meaning + context; wink vs eye twitch. **Thin description:** external act only. **Symbols:** public carriers of meaning; people act through them. **Deep play** (Bentham): stakes so high they seem irrational materially; socially meaningful. **Balinese cockfight:** not “just gambling”; dramatizes status, masculinity, kinship alliances/rivalries; people bet on roosters owned by kin/allies. **Function:** reinforces social relationships; models hierarchy. **Analogy:** sports fandom/derbies where stakes exceed rational payoff. **Test use:** If question asks why irrational acts persist, answer: symbolic/social value.

W4-5: KINSHIP BASICS

Kinship: culturally organized relatedness; not reducible to biology. **Schneider:** Western kinship assumed blood+marriage as natural; anthropology must not universalize American assumptions. **“Blood is thicker than water”:** cultural ideology, not universal fact. **Consanguineal:** blood/descent kin. **Affinal/affines:** kin by marriage. **Fictive/chosen kin:** non-biological kin treated as family. **Carsten/adoptees:** kinship made through care, co-residence, memory, documents, searching; blood may matter emotionally but not only factor. **Sahlins, mutuality of being:** kin are people who participate in each other's existence; share experiences, emotions, suffering, food, property, fate. **Hopper/TallBear:** challenge couple/nuclear family norm; love/relations beyond settler sex/family; kinship can be friendship, care networks, poly/chosen relations.

Kin Terms / Descent / Marriage

Kinship terminology: languages classify relatives differently; American English vs Tunisian Arabic; names reveal social priorities. **Hawaiian system:** same terms for mother/aunts, father/uncles, siblings/cousins by generation/sex. **Bilateral descent:** both mother/father sides. **Unilateral:** one side. **Patrilineal:** descent through father line. **Matrilinal:** descent through mother line (not same as matriarchy). **Patriarchal:** men hold authority. **Matriarchal:** women hold authority. **Patrilocal/virilocal:** live with husband's family. **Matrilocal:** live with wife's family. **Neolocal:** independent residence. **Nuclear family:** parents+children; not universal default. **OPH:** one-person households. **Marriage:** social contract/covenant/alliance; defines rights/obligations, not just love. **Love vs arranged:** not pure opposites; arranged can involve love, love marriage shaped by social structure. **Endogamy:** marry within group. **Exogamy:** marry outside. **Incest taboo:** widespread but locally defined. **Cross-cousin:** child of parent's opposite-sex sibling. **Parallel-cousin:** child of parent's same-sex sibling. **Sororate:** man marries deceased wife's sister. **Monogamy:** one spouse. **Serial monogamy:** one at a time across life. **Polygamy:** multiple spouses. **Polygyny:** one man + multiple women. **Polyandry:** one woman + multiple men; **fraternal polyandry:** brothers share wife, preserves family property. **Sienna Craig, Ends of Kinship:** Nepali diaspora, marriage practices, kinship across distance; arranged/love/residence patterns adapt transnationally. **Lasar:** many half siblings; family portrait challenges genetic/nuclear assumptions.

W6: STATE / TRIBE / POWER

State vs tribe: old contrast often oversimplifies; beware evolutionist hierarchy. **Weber:** state claims monopoly on legitimate violence within territory. **Legitimacy:** people accept authority as rightful. **Bureaucracy:** rule by offices, paperwork, procedures; impersonal but staffed by people. **Graeber bureaucracy:** paperwork can produce irrationality, delay, meaningless labor. **State from below** (Holmes): study how policies are lived by migrants/workers; state power felt in bodies, labor, borders, clinics. **Blurry state:** NGOs/corporations/global institutions do state-like work; line between state/economy not obvious. **State as aspirational:** states claim coherence/control they may not achieve.

Power Theorists

Gramsci, hegemony: domination through consent/common sense; ruling class ideas become normal. Example: standard language ideology; meritocracy. Hegemony is contestable. **Althusser, ISA:** Ideological State Apparatuses reproduce social order through schools, media, churches, family, unions; people internalize values. **Foucault, sovereign power:** premodern visible punishment/torture/executions display ruler authority. **Discipline:** modern power trains bodies through routines, surveillance, exams, timetables; creates self-regulating subjects. **Panopticon** (Bentham): central tower; prisoners might be watched so behave as if always watched; modern sites: prison, school, hospital, workplace. **Power not only top-down:** diffuse, productive, internalized. **Mitchell, fetishism of state:** common view: state separate entity acting on society. Mitchell: state effect produced through practices/representations. Study: **representations** (what state says it does), **practices** (what officials actually do), **effects** (how people encounter state). Examples: post office, border patrol, documents. **Comparison:** Weber=violence; Gramsci=ideas/consent; Althusser=institutions/ideology; Foucault=discipline/surveillance; Mitchell=state as effect.

W1-6 FAST GLOSSARY / APPLICATIONS

Social norm example: silence in library, handshake distance, waiting in line; rule is visible when broken. **Othering example:** describing dentists as “holy-mouth-men” or bathrooms as shrines makes Americans seem primitive. **Culture shock:** feeling disoriented when assumptions fail. **Reflexivity:** researcher notices own position/bias; fieldnotes include self as part of data. **Holism:** connect economy, kinship, religion, politics, language, body. **Comparativism:** compare without ranking. **Universalism warning:** do not assume Western family/state/religion/language categories apply everywhere. **Relativism warn-**

ing: explain context without excusing harm. **Dialect in Hurston:** evidence of linguistic skill, not ignorance. **Orientalist move:** explain politics as ancient culture rather than occupation/history/power. **Study up examples:** Wall Street, Pentagon, universities, landlords, police, corporations, hospitals. **Deep play answer:** material irrationality becomes socially rational because honor/status/identity are at stake. **Kinship answer:** ask who cares, feeds, lives together, inherits, mourns, sacrifices—not only DNA. **State answer:** ask how state appears in documents, borders, IDs, waiting rooms, offices, police, schools.

Likely Prompt Skeletons W1-6

“Why is Nacirema funny?” Because it uses exoticizing language on Americans, revealing ethnocentrism and the power of ethnographic description. **“What did Malinowski change?”** From distant/armchair accounts to immersive fieldwork and everyday-life observation. **“How is Hurston both insider/outside?”** Insider by race/language/region familiarity; outsider by academic role/recording; positionality is layered. **“What is Orientalism?”** Not just prejudice; a whole knowledge system that produces the Orient as knowable/inferior and supports rule. **“Culture misunderstanding?”** People act from different background assumptions, so both sides can see themselves as normal/rational. **“Power comparison?”** Weber = legitimate force; Gramsci = consent; Althusser = institutions; Foucault = self-discipline; Mitchell = state effect.

FRONT QUICK COMPARISONS

Relativism vs ethnocentrism: understand in context vs judge by own standards. Emic vs etic: insider meaning vs analytic frame. Armchair vs fieldwork: texts from afar vs immersion. Thin vs thick: act alone vs act+meaning. Culture vs biology: learned meanings vs genetic determinism. Hegemony vs discipline: consent/common sense vs self-regulation. Sovereign vs disciplinary power: public punishment vs invisible surveillance. State representation vs practice: claim vs actual operation.

W1-6 AUTHOR DETAIL BANK

Malinowski, Argonauts: ethnographer should leave white compound/veranda, live in village, learn language, collect genealogies/maps/cases, record ordinary events as they happen; goal is native's point of view + relation to life. **Boas vs evolutionists:** no single ladder of progress; cultural traits have particular histories; environment matters but does not mechanically determine culture. **Hurston method:** performance/storytelling matters; jokes/folklore are not trivial—they reveal social criticism, pleasure, and identity. **Said method:** read texts/images/scholarship as part of empire; representation produces the object it claims to merely describe. **Nader method:** if power is the problem, research should move upward toward institutions that make decisions. **Carroll examples:** privacy, hospitality, directness, conversation timing, and what counts as “home” are culturally organized. **Geertz method:** anthropologist reads culture like text, but interpretation must be grounded in public symbols/practices. **Schneider critique:** “blood” and “law” are American symbols of kinship, not universal analytic truth. **TallBear critique:** settler colonialism organizes property, sex, marriage, and family; relationality can exceed couple-form. **Holmes:** structural vulnerability; suffering of migrant laborers is produced by hierarchy yet treated as natural/personal.

W1-6 CONCEPT CHECKLIST

Norm: expected behavior; **sanction:** reaction to violation. **Ritual:** repeated meaningful practice; not only religion. **Magic label:** often used by outsiders to downgrade other practices; compare to Nacirema medicine. **Tradition:** not always ancient/static; can be invented, contested, political. **Local knowledge:** practical and situated; not inferior to science. **Positionality:** race/class/gender/nationality/language affect access and interpretation. **Representation:** who speaks, who is spoken for, which details are selected. **Dialect:** rule-governed language variety; not broken standard language. **Diaspora:** people/relations across homeland and elsewhere; kinship maintained through calls, remittances, visits, marriage. **Settler colonialism:** replacement/dispossession structure, not just past event. **Legibility:** state wants people/forms/land readable through categories, IDs, censuses, maps. **Documentation:** papers make state power real in daily life. **Surveillance:** watching or possibility of watching changes behavior. **Internalization:** power works when people monitor themselves. **Common sense:** hegemony feels natural, not ideological.

HIGH-LEVEL EXAMPLES TO DROP

Nacirema: bathrooms/dentists/hospitals show ethnographic language creates exoticism. **Balinese cockfight:** gambling reveals rank, masculinity, kinship, rivalry. **Standard language:** school teaches elite speech as correct; Gramsci/Althusser link. **Airport/border:** Mitchell state effect + Weber violence + documents. **Library/classroom:** Foucault discipline via silence, seating, grades, surveillance. **Arranged marriage:** challenges Western love-marriage ideology; shows marriage as family/social alliance. **Adoption/half siblings/chosen family:** kinship made through care, recognition, documents, and narrative. **Folklore/jokes:** serious cultural data, not merely entertainment. **Maps/censuses:** state categories create what they claim to measure. **Hospital/clinic:** body becomes site of state/medical authority; compare Nacirema + Holmes.

MINI CONTRASTS FOR SHORT ANSWERS

Relativism vs moral relativism: method of understanding vs claim that anything is okay. **Culture vs tradition:** culture is broad lived system; tradition is selected/invoked practice. **Kinship vs family:** kinship is analytic system of relatedness; family is one culturally specific form. **Descent vs residence:** who you trace relation through vs where couple lives. **Patrilineal vs patriarchal:** descent through men vs men hold authority. **Matrilinal vs matriarchal:** descent through women vs women hold authority. **Sovereignty vs discipline:** ruler's right to punish vs institutions training conduct. **Representation vs practice:** official image/claim vs everyday action. **Consent vs coercion:** hegemony makes domination feel normal; violence remains backup. **Insider vs native:** insider status is partial; “native” label can flatten complexity.

W7: GENDER / SEX / NORMS

Sex: biological traits (but also culturally interpreted). **Gender:** social meanings/roles attached to sexed bodies. **Patriarchy:** male dominance in institutions/family/culture. **Androcentrism:** male as default/standard; women marked as deviation. **Gender binary:** two naturalized categories; media reinforces difference. **Goffman:** ads/images display gender hierarchy (size, touch, gaze, posture, infantilization). **Gendered norms:** expected behavior, emotion, voice, dress, work, sexuality. **Beauty Myth** (Naomi Wolf): beauty standards discipline women; power backlash. **Judith Butler:** gender performative—repeated acts create appearance of stable identity; not fake, socially real through repetition. **Tey Meadow:** transness + “specter of the regretter”; policy/medicine overfocus on hypothetical regret, shaping access to care. **Ortner:** “Is female to male as nature is to culture?” argues many societies symbolically associate women with nature/reproduction and men with culture/public life; asks why hierarchy is constructed. **Martin, Egg and Sperm:** scientific descriptions gender cells: egg passive/damsel, sperm active/heroic; science uses cultural stereotypes. **Blair, Ejaculate Responsibly:** reframes pregnancy responsibility around men/ejaculation; challenges gendered blame. **Putnam/Reeves, Boys Not OK:** masculinity/boys in crisis discourse; analyze gender norms + institutions, not biology alone.

Gender Exam Moves

If image/ad prompt: identify gender display, hierarchy, gaze, activity/passivity. If science/medicine prompt: Martin = biological facts described through gender ideology. If trans prompt: gender norms + institutions regulate bodies. If family/reproduction prompt: link kinship + gender + responsibility.

W8: RELIGION

Religion as category: contested; not universal/self-evident; Western/Protestant bias often privileges belief, scripture, sincerity, interior faith over ritual/practice/material objects. **Orthodoxy:** claims about correct belief/practice; power decides what counts. **Legal definitions:** courts/states try to define religion, often awkwardly. **Durkheim:** religion divides sacred/profane; social group worships itself through sacred symbols. **Totemic object:** material symbol of clan/society; collective identity. **Pilgrimage:** travel to sacred site; can produce transformation, community, hierarchy, commerce. **Religious liberalism:** modern idea religion as individual choice/interiority; can enable appropriation. **Bucar, Stealing My Religion:** “playing pilgrim”; borrowing religious practices may erase power/history. **Appropriation vs borrowing:** borrowing = exchange without penalizing donor group; appropriation = host gains status/pleasure while donor group is stigmatized or dispossessed. **Musa, 1452 Poles to Karbala:** ritual/procession/material forms; religion as embodied, political, public. **Key:** religion is lived through bodies, objects, sound, movement, law, power—not just belief.

W9: RACE / ETHNICITY

Race: socially constructed classification with real effects; not biological essence. **Biological determinism:** false claim race predicts ability/behavior. **Racial common-sense:** everyday “obvious” assumptions about race. **Social construct:** made by history/institutions; real consequences. **Reification:** treating constructed category as natural thing. **Passing:** being read/accepted as another race; reveals race depends on perception/social rules. **Hypodescent:** “one-drop” rule; mixed ancestry assigned to subordinate race. **Ethnic group:** shared ancestry/culture/history claim. **Ethnicity:** identification/practice, often flexible. **Symbolic ethnicity:** optional/occasional identity practices (food, holidays) especially for privileged groups. **Whiteness:** racial position often unmarked/default; carries privilege. **Garcia:** race/ethnicity are social but embodied in institutions/health/life chances. **NYT Conversation with White People:** whiteness, discomfort, racial ignorance as social position.

Falls / Reversal / Slurs

Falls, Redneck Customs: demolition derby as race/class performance; “redneck” identity can be reclaimed; ritual/rite of reversal temporarily inverts hierarchy (valuing roughness, destruction, working-class masculinity). **Butler + slurs:** reclaiming resignifies injury, but never fully controlled; context matters. **Bilici, Muslim ethnic comedy:** humor can invert Islamophobia, expose stereotypes, produce solidarity. **Rite of reversal:** temporary inversion of power/social order; not necessarily permanent revolution. Use for comedy, festivals, derby, Key & Peele names.

W9: CLASS / BOURDIEU

Marxian class: relation to means of production; bourgeoisie own, proletariat sell labor. **Class consciousness:** awareness of shared class position. **Bourdieu:** class reproduced through capital + habitus + taste. **Economic capital:** money/assets. **Social capital:** networks/connections.

Cultural capital: valued knowledge, manners, credentials, speech, taste. **Habitus:** embodied dispositions shaped by social position; what feels natural/easy/beautiful. **Taste:** judgments of food/music/art/style mark class; presented as personal preference but socially patterned. **Symbolic violence:** dominated groups accept hierarchy as natural/legitimate. **People Like Us/Tammy’s Story:** class visible in speech, home, work, taste; moral judgments attach to poverty. **Language link:** standard language ideology = cultural capital.

W10: ECONOMY / VALUE

Commodity: object/service produced for exchange. **Use value:** usefulness. **Exchange value:** market value relative to other commodities. **Labor theory of value** (Marx): value rooted in socially necessary labor time. **Surplus value:** profit extracted from labor. **Commodity fetishism:** social relations between workers appear as relations between things; commodity hides labor/exploitation. **Money** (Maurer): not just neutral tool; social, symbolic, moral, emotional. **Fetishization of money:** money treated as if it has independent power. **Capitalism:** wage labor, private ownership, accumulation, markets. **Luxemburg:** capitalism tied to colonial expansion/noncapitalist spaces. **Crisis** (Roitman): “crisis” is a narrative framing that implies normality + rupture. **Weber:** Protestant ethic linked religious discipline to capitalist productivity. **Ibn Khaldun:** social cohesion/production/state cycles; early social theory. **Waldfoegel, Deadweight Loss of Christmas:** gifts can destroy economic efficiency; contrasts econ rationality with social value. **Adam Grant / productivity:** American moral script equates productivity with goodness. **Cameron Hay-Rollins:** cultural scripts define hard work, worth, deservingness. **Graeber, Bullshit Jobs:** jobs workers believe are pointless; capitalism/bureaucracy produce meaningless labor despite productivity ideals.

Mauss / Gift

Mauss: gifts are never free; obligations to give, receive, reciprocate. **Hau:** spirit/force of gift that compels return. **Gift exchange:** creates social bonds, hierarchy, debt, alliance. **Compare:** Marx=commodities hide social relations; Mauss=gifts openly create social relations. **Hidden Brain emotional currency:** money/gifts carry emotion and relationship meaning beyond price.

W11: FOOD / ANIMALS / ENV

Food ideology: moral/cultural beliefs about eating (clean, natural, ethical, masculine, healthy). **Safran Foer, eating dogs:** disgust is cultural; challenges arbitrary animal categories. **Carol Adams:** “meat” erases animal subject; absent referent; links animal suffering and gendered domination. **Cincy Freedom:** escaped cow becomes individual/subject, not meat. **Challenger:** humans as predators have special responsibility due to intelligence/choice. **Berry, disavowal of earth:** modern life hides dependence on land/labor/ecology. **Indigenous relations w/ natural world:** often contrasted w/ Western industrial nature/culture split, but avoid romanticizing. **Anthropocentrism:** human-centered worldview. **Anthropocene:** epoch/idea of massive human planetary impact. **Tsing:** let go of teleology/progress narratives; attend to multispecies worlds, precarity, ruins. **Posthuman imaginary:** decenter human; think animals, plants, objects, environments as actors/relations. **Embodied intelligence:** intelligence not only abstract cognition; bodily/environmental skill. **Rights of Nature film:** legal personhood for rivers/ecosystems; challenges human-only rights.

Medical Anthropology

Medical anthro: studies illness/health/healing as biological + cultural + political-economic. Questions: Who gets sick? Who gets care? How is suffering interpreted? How do institutions produce harm? **Holmes, Fresh Fruit:** migrant farmworkers’ bodily suffering linked to labor hierarchy, racism, citizenship, clinics; “naturalized” inequality. **Intersectionality:** overlapping systems (race/class/gender/citizenship) shape vulnerability. **Symbolic violence:** inequality misrecognized as personal failure/natural difference. **Photo analysis** (Llorens/Sontag): images frame suffering; spectatorship has ethics; photos can reveal or objectify.

W12: SPACE / PLACE / BODY

Yi-Fu Tuan: space = openness/abstraction; place = space made meaningful through experience, memory, attachment. **Public/private:** culturally made distinction; power decides access, surveillance, respectability. **Space + class:** neighborhoods, homes, schools, stores, transportation encode inequality. **Habitus + techniques of body:** learned ways of sitting, walking, speaking, eating, studying; class/culture embodied. **Home** (Carroll): not universal meaning; privacy, hospitality, comfort differ. **Conversation** (Carroll): turning-taking, silence, directness, interruption vary cross-culturally.

Time / History

Time: spoken as space (ahead/behind, long/short, moving forward); socially organized by calendars, schedules, waiting, deadlines. **Jackson, temporal experience:** people live time differently; past/present/future shaped by memory, suffering, hope, politics. **Bringing past into present:** monuments, rituals, museums, stories, land claims, law, trauma, holidays. **History writing:** not neutral; selects perspective. **Silverman, This Land is Their Land:** critical history of U.S. founding/Indigenous dispossession; challenges celebratory national narratives. **Critical history:** asks whose past is centered, erased, or justified.

Sound / Silence

John Cage, 4’33”: silence is never empty; listening reveals ambient sound and expectations about music/art. **Basso:** silence has social meaning; not merely absence; can show respect, anger, uncertainty depending context. **Sacred sounds:** sound can create religious authority, atmosphere, belonging. **Goshadze, Ghana harvest festival:** “quiet” vs “not-noise”; sound judged by social meaning, not just decibels. **Sound claims space:** music, bells, calls, chants, noise complaints mark belonging/power. **Sonic experience:** hearing is cultural/political.

LANGUAGE / POWER (FINAL LECTURES)

Standard language ideology: belief there is one correct way to speak; privileges elite speech and marginalizes dialects. **Language stratification:** varieties ranked by power, not logic. **Cultural capital:** knowing prestigious pronunciation/names/language gives access. **Key & Peele substitute teacher:** joke is reversal; white names revealed as convention too; de-centers white norms. **Mock Spanish** (Jane Hill): “Cinco de Drinko,” adding -o; allows white speakers to appear relaxed/funny while Spanish speakers are stereotyped as lazy/party/drunken. **Appropriation vs borrowing:** host group gains value; donor group punished for same practice. **AAE example:** used by outsiders for humor/coolness/sexual sophistication while Black speakers face discrimination. **LGBTQ language:** “yas queen” can signal safe/cosmopolitan identity for outsiders; context matters. **Young, Should Writers Use They Own English?:** challenges standard English dominance; code-meshing; language justice.

Military Anthropology / Ethics

Human Terrain System: social scientists embedded with military in Iraq/Afghanistan. Debate: applied anthro to reduce harm vs complicity in occupation/war. **Gusterson:** problem not lack of cultural understanding but occupation; anthropologists should study culture of national security state. **AAA:** broad consensus against anthropologists as military tools. **Big Q:** What is knowledge for? For whom? Does “getting hands dirty” help or legitimate violence?

W7–12 FAST GLOSSARY / APPLICATIONS

Androcentrism example: “mankind,” male crash-test dummy, male symptoms as medical default. **Performative example:** clothes, voice, posture, pronouns, repeated recognition make gender feel natural. **Religion prompt:** ask who has authority to define sacred/orthodox/real religion. **Appropriation prompt:** ask whether donor group is respected/paid/free to practice or stigmatized. **Race prompt:** explain how category is constructed, then show real institutional effects. **Class prompt:** taste/language/credentials feel personal but reproduce hierarchy. **Commodity prompt:** identify hidden labor/social relations behind object. **Gift prompt:** identify obligation/debt/status, not price. **Food prompt:** disgust and ethics reveal culture; animal categories are not natural. **Medical prompt:** connect body suffering to labor, policy, race/class/citizenship. **Space/place prompt:** ask how memory/power turns location into meaningful place. **Sound prompt:** not all sound is “noise”; judgment depends on belonging/power/context. **Photo prompt:** who is pictured, by whom, for whom, what emotion/politics produced?

More Author Hooks

Ehrenreich, Nickel and Dimed: low-wage work is exhausting and expensive; poverty is produced, not moral failure. **Bourgeois/Schonberg:** addiction/homelessness through structural violence, not individual pathology alone. **Meneley:** sociability and hierarchy in Yemeni town; value created through hosting, exchange, reputation. **Abu-Lughod:** Bedouin poetry expresses sentiment indirectly where honor/modesty restrict open emotion; language reveals gender/power. **Invisibilia emotions:** emotions are culturally learned/managed, not purely internal biology. **Hidden Brain money:** exchange can damage or express relationships depending framing. **4’33”:** listening practice reveals social expectations around art/noise/silence. **Human Terrain:** ethics of applied knowledge under military occupation.

READING INDEX - ONE-LINE TRIGGERS

Miner=Nacirema/ethnocentrism. Boas=relativism/anti-racism/Eskimo. Malinowski=fieldwork/imponderabilia. Hurston=dialect/insider/burden. Said=Orientalism/power-knowledge. Nader=study up. Carroll=misunderstandings/home/conversation. Geertz=thick description/deep play. Schneider=kinship not biology. Lasar=half siblings/nontraditional family. Hopper=chosen love/against couple norm. TallBear=relations beyond settler family. Craig=diaspora kinship. Foucault=punishment/panopticon. Holmes=migrant suffering/state below. Ortner=female/nature. Putnam/Reeves=boys crisis. Blair=male responsibility. Martin=gendered science. Musa=Karbala ritual. Durkheim=totem/social cohesion. Bucar=religious appropriation. Garcia=race/ethnicity. Falls=redneck/reversal. Bourdieu=capital/habitus/taste. Marx=commodity/labor/fetishism. Mauss=gift/hau/obligation. Graeber=bullshit jobs/bureaucracy. Ehrenreich=low-wage labor. Adams=meat/appeal referent. Bourgeois/Schonberg=addiction/poverty/structural violence. Meneley=value/hierarchy/sociability. Jackson=time. Silverman=critical Indigenous history. Goshadze=quiet/not-noise. Bilici=Muslim comedy. Hill=mock Spanish. Young=language justice. Abu-Lughod=Bedouin poetry/sentiment; indirect expression reveals honor/gender/social hierarchy.

EXAM ANSWER FORMULAS

Define: term + theorist + contrast + example. **Apply:** identify case details, name concept, show how concept explains meaning/power. **Compare:** same problem, different mechanism. **Good pairs:** Boas vs ethnocentrism; Geertz vs thin description; Weber/Gramsci/Foucault/Mitchell; Marx vs Mauss; borrowing vs appropriation; race as construct vs biological determinism; space vs place; sex vs gender. **Universal warning:** avoid saying “they believe weird things”; write “within this system, practice means X and does Y.” **Power warning:** ask who benefits, who is represented, who is silenced, what institution reproduces it. **Culture warning:** culture is not an excuse; it is context, meaning, practice, and power.
